DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 5,817,087 to Takabayashi, in view of U.S. Patent 6,113,717 to Vogt. Takabayashi discloses applicant's basic inventive concept, a shorts type disposable diaper (FIG. 1, 1), comprising two liquid permeable waist sheets, back and top (10 and 30 combined), with two elastic members (11 and 21) located at the waist and along the opening for legs, respectively, substantially as claimed with the exception of placing a third elastic region and specifying the strength of bonding zones to be in a range of 4 to about 40 N with respect to a 25 mm longitudinal dimension of said bonding zone and having the elastic members end before they enter their respective bonding zones (per amendment A). Vogt shows the latter feature to be old in the disposable undergarment art (FIG. 1, 58). It still would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disposable undergarment of Takabayashi in view of Vogt, by adding a third elastic member below and in parallel the first one

(11) in order to improve the efficiency of the product. Also, from the discussion in columns 5-8, one can assume that the selection of proper elastomer to be used can render the specs claimed by the applicant.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
